Notice

While reasonable efforts have been made to ensure that the information in this document is complete and accurate at the time of printing, Avaya assumes no liability for any errors. Avaya reserves the right to make changes and corrections to the information in this document without the obligation to notify any person or organization of such changes.

Documentation disclaimer

"Documentation" means information published by Avaya in varying mediums which may include product information, operating instructions and performance specifications that Avaya may generally make available to users of its products and Hosted Services. Documentation does not include marketing materials. Avaya shall not be responsible for any modifications, additions, or deletions to the original published version of documentation unless such modifications, additions, or deletions were performed by Avaya. End User agrees to indemnify and hold harmless Avaya, Avaya's agents, servants and employees against all claims, lawsuits, demands and judgments arising out of, or in connection with, subsequent modifications, additions or deletions to this documentation, to the extent made by End User.

Link disclaimer

Avaya is not responsible for the contents or reliability of any linked websites referenced within this site or documentation provided by Avaya. Avaya is not responsible for the accuracy of any information, statement or content provided on these sites and does not necessarily endorse the products, services, or information described or offered within them. Avaya does not guarantee that these links will work all the time and has no control over the availability of the linked pages.

Warranty

Avaya provides a limited warranty on Avaya hardware and software. Refer to your sales agreement to establish the terms of the limited warranty. In addition, Avaya's standard warranty language, as well as information regarding support for this product while under warranty is available to Avaya customers and other parties through the Avaya Support website: <https://support.avaya.com/helpcenter/getGenericDetails?detailId=C20091120112456651010> under the link "Warranty & Product Lifecycle" or such successor site as designated by Avaya. Please note that if You acquired the product(s) from an authorized Avaya Channel Partner outside of the United States and Canada, the warranty is provided to You by said Avaya Channel Partner and not by Avaya.

"Hosted Service" means a hosted service subscription that You acquire from either Avaya or an authorized Avaya Channel Partner (as applicable) and which is described further in Hosted SAS or other service description documentation regarding the applicable hosted service. If You purchase a Hosted Service subscription, the foregoing limited warranty may not apply but You may be entitled to support services in connection with the Hosted Service as described further in your service description documents for the applicable Hosted Service. Contact Avaya or Avaya Channel Partner (as applicable) for more information.

Hosted Service

THE FOLLOWING APPLIES IF YOU PURCHASE A HOSTED SERVICE SUBSCRIPTION FROM AVAYA OR AN AVAYA CHANNEL PARTNER (AS APPLICABLE), THE TERMS OF USE FOR HOSTED SERVICES ARE AVAILABLE ON THE AVAYA WEBSITE, [HTTPS://SUPPORT.AVAYA.COM/LICENSEINFO](https://support.avaya.com/LicenseInfo) UNDER THE LINK "Avaya Terms of Use for Hosted Services" OR SUCH SUCCESSOR SITE AS DESIGNATED BY AVAYA, AND ARE APPLICABLE TO ANYONE WHO ACCESSES OR USES THE HOSTED SERVICE, BY ACCESSING OR USING THE HOSTED SERVICE, OR AUTHORIZING OTHERS TO DO SO, YOU, ON BEHALF OF YOURSELF AND THE ENTITY FOR WHOM YOU ARE DOING SO (HEREINAFTER REFERRED TO INTERCHANGEABLY AS "YOU" AND "END USER"), AGREE TO THE TERMS OF USE. IF YOU ARE ACCEPTING THE TERMS OF USE ON BEHALF A COMPANY OR OTHER LEGAL ENTITY, YOU REPRESENT THAT YOU HAVE THE AUTHORITY TO BIND SUCH ENTITY TO THESE

TERMS OF USE. IF YOU DO NOT HAVE SUCH AUTHORITY, OR IF YOU DO NOT WISH TO ACCEPT THESE TERMS OF USE, YOU MUST NOT ACCESS OR USE THE HOSTED SERVICE OR AUTHORIZE ANYONE TO ACCESS OR USE THE HOSTED SERVICE. YOUR USE OF THE HOSTED SERVICE SHALL BE LIMITED BY THE NUMBER AND TYPE OF LICENSES PURCHASED UNDER YOUR CONTRACT FOR THE HOSTED SERVICE, PROVIDED, HOWEVER, THAT FOR CERTAIN HOSTED SERVICES IF APPLICABLE, YOU MAY HAVE THE OPPORTUNITY TO USE FLEX LICENSES, WHICH WILL BE INVOICED ACCORDING TO ACTUAL USAGE ABOVE THE CONTRACT LICENSE LEVEL. CONTACT AVAYA OR AVAYA'S CHANNEL PARTNER FOR MORE INFORMATION ABOUT THE LICENSES FOR THE APPLICABLE HOSTED SERVICE, THE AVAILABILITY OF ANY FLEX LICENSES (IF APPLICABLE), PRICING AND BILLING INFORMATION, AND OTHER IMPORTANT INFORMATION REGARDING THE HOSTED SERVICE.

Licenses

THE SOFTWARE LICENSE TERMS AVAILABLE ON THE AVAYA WEBSITE, [HTTPS://SUPPORT.AVAYA.COM/LICENSEINFO](https://support.avaya.com/LicenseInfo), UNDER THE LINK "AVAYA SOFTWARE LICENSE TERMS (Avaya Products)" OR SUCH SUCCESSOR SITE AS DESIGNATED BY AVAYA, ARE APPLICABLE TO ANYONE WHO DOWNLOADS, USES AND/OR INSTALLS AVAYA SOFTWARE, PURCHASED FROM AVAYA INC., ANY AVAYA AFFILIATE, OR AN AVAYA CHANNEL PARTNER (AS APPLICABLE) UNDER A COMMERCIAL AGREEMENT WITH AVAYA OR AN AVAYA CHANNEL PARTNER. UNLESS OTHERWISE AGREED TO BY AVAYA IN WRITING, AVAYA DOES NOT EXTEND THIS LICENSE IF THE SOFTWARE WAS OBTAINED FROM ANYONE OTHER THAN AVAYA, AN AVAYA AFFILIATE OR AN AVAYA CHANNEL PARTNER; AVAYA RESERVES THE RIGHT TO TAKE LEGAL ACTION AGAINST YOU AND ANYONE ELSE USING OR SELLING THE SOFTWARE WITHOUT A LICENSE. BY INSTALLING, DOWNLOADING OR USING THE SOFTWARE, OR AUTHORIZING OTHERS TO DO SO, YOU, ON BEHALF OF YOURSELF AND THE ENTITY FOR WHOM YOU ARE INSTALLING, DOWNLOADING OR USING THE SOFTWARE (HEREINAFTER REFERRED TO INTERCHANGEABLY AS "YOU" AND "END USER"), AGREE TO THESE TERMS AND CONDITIONS AND CREATE A BINDING CONTRACT BETWEEN YOU AND AVAYA INC. OR THE APPLICABLE AVAYA AFFILIATE ("AVAYA").

Avaya grants You a license within the scope of the license types described below, with the exception of Heritage Nortel Software, for which the scope of the license is detailed below. Where the order documentation does not expressly identify a license type, the applicable license will be a Designated System License. The applicable number of licenses and units of capacity for which the license is granted will be one (1), unless a different number of licenses or units of capacity is specified in the documentation or other materials available to You. "Software" means computer programs in object code, provided by Avaya or an Avaya Channel Partner, whether as stand-alone products, pre-installed on hardware products, and any upgrades, updates, patches, bug fixes, or modified versions thereto. "Designated Processor" means a single stand-alone computing device. "Server" means a Designated Processor that hosts a software application to be accessed by multiple users. "Instance" means a single copy of the Software executing at a particular time: (i) on one physical machine; or (ii) on one deployed software virtual machine ("VM") or similar deployment.

License types

Designated System(s) License (DS). End User may install and use each copy or an Instance of the Software only on a number of Designated Processors up to the number indicated in the order. Avaya may require the Designated Processor(s) to be identified in the order by type, serial number, feature key, Instance, location or other specific designation, or to be provided by End User to Avaya through electronic means established by Avaya specifically for this purpose.

Heritage Nortel Software

"Heritage Nortel Software" means the software that was acquired by Avaya as part of its purchase of the Nortel Enterprise Solutions Business in December 2009. The Heritage Nortel Software is the software contained within the list of Heritage Nortel Products located at <https://support.avaya.com/LicenseInfo> under the link "Heritage

Nortel Products” or such successor site as designated by Avaya. For Heritage Nortel Software, Avaya grants Customer a license to use Heritage Nortel Software provided hereunder solely to the extent of the authorized activation or authorized usage level, solely for the purpose specified in the Documentation, and solely as embedded in, for execution on, or for communication with Avaya equipment. Charges for Heritage Nortel Software may be based on extent of activation or use authorized as specified in an order or invoice.

Copyright

Except where expressly stated otherwise, no use should be made of materials on this site, the Documentation, Software, Hosted Service, or hardware provided by Avaya. All content on this site, the documentation, Hosted Service, and the product provided by Avaya including the selection, arrangement and design of the content is owned either by Avaya or its licensors and is protected by copyright and other intellectual property laws including the sui generis rights relating to the protection of databases. You may not modify, copy, reproduce, republish, upload, post, transmit or distribute in any way any content, in whole or in part, including any code and software unless expressly authorized by Avaya. Unauthorized reproduction, transmission, dissemination, storage, and or use without the express written consent of Avaya can be a criminal, as well as a civil offense under the applicable law.

Virtualization

The following applies if the product is deployed on a virtual machine. Each product has its own ordering code and license types. Note that each Instance of a product must be separately licensed and ordered. For example, if the end user customer or Avaya Channel Partner would like to install two Instances of the same type of products, then two products of that type must be ordered.

Third Party Components

“Third Party Components” mean certain software programs or portions thereof included in the Software or Hosted Service may contain software (including open source software) distributed under third party agreements (“Third Party Components”), which contain terms regarding the rights to use certain portions of the Software (“Third Party Terms”). As required, information regarding distributed Linux OS source code (for those products that have distributed Linux OS source code) and identifying the copyright holders of the Third Party Components and the Third Party Terms that apply is available in the products, Documentation or on Avaya’s website at: <https://support.avaya.com/Copyright> or such successor site as designated by Avaya. The open source software license terms provided as Third Party Terms are consistent with the license rights granted in these Software License Terms, and may contain additional rights benefiting You, such as modification and distribution of the open source software. The Third Party Terms shall take precedence over these Software License Terms, solely with respect to the applicable Third Party Components to the extent that these Software License Terms impose greater restrictions on You than the applicable Third Party Terms.

The following applies if the H.264 (AVC) codec is distributed with the product. THIS PRODUCT IS LICENSED UNDER THE AVC PATENT PORTFOLIO LICENSE FOR THE PERSONAL USE OF A CONSUMER OR OTHER USES IN WHICH IT DOES NOT RECEIVE REMUNERATION TO (i) ENCODE VIDEO IN COMPLIANCE WITH THE AVC STANDARD (“AVC VIDEO”) AND/OR (ii) DECODE AVC VIDEO THAT WAS ENCODED BY A CONSUMER ENGAGED IN A PERSONAL ACTIVITY AND/OR WAS OBTAINED FROM A VIDEO PROVIDER LICENSED TO PROVIDE AVC VIDEO. NO LICENSE IS GRANTED OR SHALL BE IMPLIED FOR ANY OTHER USE. ADDITIONAL INFORMATION MAY BE OBTAINED FROM MPEG LA, L.L.C. SEE [HTTP://WWW.MPEGLA.COM](http://www.mpegla.com).

Service Provider

THE FOLLOWING APPLIES TO AVAYA CHANNEL PARTNER’S HOSTING OF AVAYA PRODUCTS OR SERVICES. THE PRODUCT OR HOSTED SERVICE MAY USE THIRD PARTY COMPONENTS SUBJECT TO THIRD PARTY TERMS AND REQUIRE A SERVICE PROVIDER TO BE INDEPENDENTLY LICENSED DIRECTLY FROM THE THIRD PARTY SUPPLIER. AN AVAYA CHANNEL PARTNER’S HOSTING OF AVAYA PRODUCTS MUST BE AUTHORIZED IN WRITING BY AVAYA AND IF THOSE HOSTED PRODUCTS USE OR EMBED CERTAIN THIRD PARTY SOFTWARE, INCLUDING BUT NOT LIMITED TO MICROSOFT

SOFTWARE OR CODECS, THE AVAYA CHANNEL PARTNER IS REQUIRED TO INDEPENDENTLY OBTAIN ANY APPLICABLE LICENSE AGREEMENTS, AT THE AVAYA CHANNEL PARTNER’S EXPENSE, DIRECTLY FROM THE APPLICABLE THIRD PARTY SUPPLIER.

WITH RESPECT TO CODECS, IF THE AVAYA CHANNEL PARTNER IS HOSTING ANY PRODUCTS THAT USE OR EMBED THE G.729 CODEC, H.264 CODEC, OR H.265 CODEC, THE AVAYA CHANNEL PARTNER ACKNOWLEDGES AND AGREES THE AVAYA CHANNEL PARTNER IS RESPONSIBLE FOR ANY AND ALL RELATED FEES AND/OR ROYALTIES. THE G.729 CODEC IS LICENSED BY SIPRO LAB TELECOM INC. SEE WWW.SIPRO.COM/CONTACT.HTML. THE H.264 (AVC) CODEC IS LICENSED UNDER THE AVC PATENT PORTFOLIO LICENSE FOR THE PERSONAL USE OF A CONSUMER OR OTHER USES IN WHICH IT DOES NOT RECEIVE REMUNERATION TO: (I) ENCODE VIDEO IN COMPLIANCE WITH THE AVC STANDARD (“AVC VIDEO”) AND/OR (II) DECODE AVC VIDEO THAT WAS ENCODED BY A CONSUMER ENGAGED IN A PERSONAL ACTIVITY AND/OR WAS OBTAINED FROM A VIDEO PROVIDER LICENSED TO PROVIDE AVC VIDEO. NO LICENSE IS GRANTED OR SHALL BE IMPLIED FOR ANY OTHER USE. ADDITIONAL INFORMATION FOR H.264 (AVC) AND H.265 (HEVC) CODECS MAY BE OBTAINED FROM MPEG LA, L.L.C. SEE [HTTP://WWW.MPEGLA.COM](http://WWW.MPEGLA.COM).

Compliance with Laws

Customer acknowledges and agrees that it is responsible for complying with any applicable laws and regulations, including, but not limited to laws and regulations related to call recording, data privacy, intellectual property, trade secret, fraud, and music performance rights, in the country or territory where the Avaya product is used.

Preventing Toll Fraud

“Toll Fraud” is the unauthorized use of your telecommunications system by an unauthorized party (for example, a person who is not a corporate employee, agent, subcontractor, or is not working on your company’s behalf). Be aware that there can be a risk of Toll Fraud associated with your system and that, if Toll Fraud occurs, it can result in substantial additional charges for your telecommunications services.

Avaya Toll Fraud intervention

If You suspect that You are being victimized by Toll Fraud and You need technical assistance or support, call Technical Service Center Toll Fraud Intervention Hotline at +1-800-643-2353 for the United States and Canada. For additional support telephone numbers, see the Avaya Support website: <https://support.avaya.com> or such successor site as designated by Avaya.

Security Vulnerabilities

Information about Avaya’s security support policies can be found in the Security Policies and Support section of <https://support.avaya.com/security>.

Suspected Avaya product security vulnerabilities are handled per the Avaya Product Security Support Flow (<https://support.avaya.com/css/P8/documents/100161515>).

Downloading Documentation

For the most current versions of Documentation, see the Avaya Support website: <https://support.avaya.com>, or such successor site as designated by Avaya.

Contact Avaya Support

See the Avaya Support website: <https://support.avaya.com> for product or Hosted Service notices and articles, or to report a problem with your Avaya product or Hosted Service. For a list of support telephone numbers and contact addresses, go to the Avaya Support website: <https://support.avaya.com> (or such successor site as designated by Avaya), scroll to the bottom of the page, and select Contact Avaya Support.

Regulatory Statements

Australia Statements

Handset Magnets Statement

 **Danger:**

The handset receiver contains magnetic devices that can attract small metallic objects. Care should be taken to avoid personal injury.

Handset Amplification Statement

Enabling the amplified capability will result in the handset not being compliant to all Australian S004 requirements, but will allow the handset to be fully compliant with United States 508 Section 1194.23(f) Standards.

Industry Canada (IC) Statements

RSS Standards Statement

This device complies with Industry Canada licence-exempt RSS standard(s). Operation is subject to the following two conditions:

1. This device may not cause interference, and
2. This device must accept any interference, including interference that may cause undesired operation of the device.

Le présent appareil est conforme aux CNR d'Industrie Canada applicables aux appareils radio exempts de licence. L'exploitation est autorisée aux deux conditions suivantes:

1. L'appareil ne doit pas produire de brouillage, et
2. L'utilisateur de l'appareil doit accepter tout brouillage radioélectrique subi, même si le brouillage est susceptible d'en compromettre le fonctionnement.

Radio Transmitter Statement

Under Industry Canada regulations, this radio transmitter may only operate using an antenna of a type and maximum (or lesser) gain approved for the transmitter by Industry Canada. To reduce potential radio interference to other users, the antenna type and its gain should be so chosen that the equivalent isotropically radiated power (EIRP) is not more than that necessary for successful communication.

Conformément à la réglementation d'Industrie Canada, le présent émetteur radio peut fonctionner avec une antenne d'un type et d'un gain maximal (ou inférieur) approuvé pour l'émetteur par Industrie Canada. Dans le but de réduire les risques de brouillage radioélectrique à l'intention des autres utilisateurs, il faut choisir le type d'antenne et son gain de sorte que la puissance isotrope rayonnée équivalente ne dépasse pas l'intensité nécessaire à l'établissement d'une communication satisfaisante.

This Class B digital apparatus complies with Canadian ICES-003.

Cet appareil numérique de la classe B est conforme à la norme NMB-003 du Canada.

Radiation Exposure Statement

This device complies with Industry Canada's RF radiation exposure limits set forth for the general population (uncontrolled environment) and must not be co-located or operated in conjunction with any other antenna or transmitter.

Cet appareil est conforme aux limites d'exposition aux rayonnements RF d'Industrie Canada énoncés dans la population générale (environnement non contrôlé) et ne doivent pas être co-situés ou exploités conjointement avec une autre antenne ou émetteur.

Japan Statements

Class B Statement

This is a Class B product based on the standard of the VCCI Council. If this is used near a radio or television receiver in a domestic environment, it may cause radio interference. Install and use the equipment according to the instruction manual.

Denan Power Cord Statement

 **Danger:**

Please be careful of the following while installing the equipment:

- Please only use the connecting cables, power cord, and AC adapters shipped with the equipment or specified by Avaya to be used with the equipment. If you use any other equipment, it may cause failures, malfunctioning, or fire.
- Power cords shipped with this equipment must not be used with any other equipment. In case the above guidelines are not followed, it may lead to death or severe injury.

本製品を安全にご使用頂くため、以下のことにご注意ください。

- 接続ケーブル、電源コード、ACアダプタなどの部品は、必ず製品に同梱されております添付品または指定品をご使用ください。添付品指定品以外の部品をご使用になると故障や動作不良、火災の原因となることがあります。
- 同梱されております付属の電源コードを他の機器には使用しないでください。上記注意事項を守らないと、死亡や大怪我など人身事故の原因となることがあります。

México Statement

The operation of this equipment is subject to the following two conditions:

1. It is possible that this equipment or device may not cause harmful interference, and
2. This equipment or device must accept any interference, including interference that may cause undesired operation.

La operación de este equipo está sujeta a las siguientes dos condiciones:

1. Es posible que este equipo o dispositivo no cause interferencia perjudicial y
2. Este equipo o dispositivo debe aceptar cualquier interferencia, incluyendo la que pueda causar su operación no deseada.

Power over Ethernet (PoE) Statement

This equipment must be connected to PoE networks without routing to the outside plant.

Taiwan Low Power Radio Waves Radiated Devices Statement

802.11b/802.11g/BT:

Article 12 — Without permission granted by the NCC, any company, enterprise, or user is not allowed to change frequency, enhance transmitting power or alter original characteristic as well as performance to an approved low power radio-frequency devices.

Article 14 — The low power radio-frequency devices shall not influence aircraft security and interfere legal communications; If found, the user shall cease operating immediately until no interference is achieved. The said legal communications means radio communications is operated in compliance with the Telecommunications Act. The low power radio-frequency devices must be susceptible with the interference from legal communications or ISM radio wave radiated devices.

802.11b/802.11g/BT 警語：

第十二條→經型式認證合格之低功率射頻電機，非經許可，公司、商號或使用者均不得擅自變更頻率、加大功率或變更原設計之特性及功能。

第十四條→低功率射頻電機之使用不得影響飛航安全及干擾合法通信；經發現有干擾現象時，應立即停用，並改善至無干擾時方得繼續使用。前項合法通信，指依電信法規定作業之無線電通信。低功率射頻電機須忍受合法通信或工業、科學及醫療用電波輻射性電機設備之干擾。

U.S. Federal Communications Commission (FCC) Statements

Compliance Statement

The changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

To comply with the FCC RF exposure compliance requirements, this device and its antenna must not be co-located or operating in conjunction with any other antenna or transmitter.

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions:

1. This device may not cause harmful interference, and
2. This device must accept any interference received, including interferences that may cause undesired operation.

Class B Part 15 Statement

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designated to provide reasonable protection against harmful interferences in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interferences to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

Radiation Exposure Statement

This equipment complies with FCC radiation exposure limits set forth for an uncontrolled environment. This equipment should be installed and operated with minimum distance of 8 in or 20 cm between the radiator and your body. This transmitter must not be co-located or operating in conjunction with any other antenna or transmitter.

EU Countries

This device complies with the essential requirements and other relevant provisions of Directive 1999/5/EC. A copy of the Declaration may be obtained from <http://support.avaya.com> or Avaya Inc., 211 Mt. Airy Road, Basking Ridge, NJ 07920 USA.

General Safety Warning

- Use only the Avaya approved Limited Power Source power supplies specified for this product.
- There is a risk of explosion if you use an incorrect type of battery in the DECT handset. Replace used batteries with the correct battery type: Nickel Metal Hydride (NiMH), rechargeable, size AAA.
 - This product uses NiMH batteries which are recyclable and must not be disposed of as municipal waste to reduce the risk of releasing substances into the environment. At the end of the battery's useful life, remove the rechargeable batteries and take them to the nearest battery collection location to be recycled.
- Ensure that you:
 - Do not operate the device near water.
 - Do not use the device during a lightning storm.
 - Do not report a gas leak while in the vicinity of the leak.
 - Limit the power to the device over telecommunications wiring to 36-57 volt DC or ≤ 1.3 ampere DC.

To ensure the EMC Class B compliance when using a Collaboration Station with an external HDMI monitor, the monitor must be of a type with an external AC or DC power supply.

Support

Go to the Avaya Support website at <http://support.avaya.com> for the most up-to-date documentation, product notices, and knowledge articles. You can also search for release notes, downloads, and resolutions to issues. Use the online service request system to create a service request. Chat with live agents to get answers to questions, or request an agent to connect you to a support team if an issue requires additional expertise.

Chapter 2: Avaya H175 Video Collaboration Station overview

The Avaya H175 Video Collaboration Station is SIP-based VoIP HD video deskphone that enterprises can use for audio, video, and conference communications. The Collaboration Station combines the functionality of a business telephone and an executive video conference system.

You can use the Collaboration Station as:

- A traditional video phone by mounting the camera on the device.
- A high-end conference system by mounting the camera on an external monitor.

You can also connect the Collaboration Station and your personal computer to an external monitor to get the picture-in-picture (PiP) functionality as shown in the image below.

Physical system protection requirements

Ensure that you:

- Use only those HDMI cables that include internal grounding conductivity, which is a required HDMI standard.
- Put the device on a flat surface, such as a table, for proper heat dissipation. The heat from the device dissipates from the lower plastic cover and finally through the space between the rubber foot pads. Therefore, the lower plastic part is relatively warmer.
- Do not keep any object, such as paper or cloth, below the device.
- Do not operate the device near water.
- Do not use the device during a lightning storm.
- Limit the power to the device over telecommunications wiring to 36-57 volt DC or ≤ 1.3 ampere DC.

Supported apps

The Collaboration Station supports the following apps:

App	Use to
Communication	Manage audio, video, and conference calls.
Contacts	Manage contacts from Microsoft Exchange Server and Avaya Aura® accounts.
Calendar	Manage Microsoft Exchange Server calendar events.
History	Manage audio, video, and conference call history.
Settings	Manage the Collaboration Station settings and personalization.
Voicemail	Manage voice mails.
Browser	Open the web browser.
Calculator	Perform simple and scientific calculations and conversions.
Clock	Manage clock settings and alarms.
Downloads	Show file download progress and download history.
Gallery	Manage media files.
Lock	Lock your Collaboration Station screen.
Logout	Log out of the Collaboration Station.
Help	View HTML help for the Collaboration Station.
Avaya.com	Provides a link to the Avaya website.

The Collaboration Station does not support third-party Android apps.

Supported widgets

Collaboration Station supports the following widgets that display on the Homescreen:

Widget	Purpose
Analog clock	Adds an analog clock.
Bookmark	Adds a shortcut to the URL from the browser bookmark.
Calendar	Provides quick access to the date and upcoming Microsoft Exchange Server calendar events.
Digital clock	Adds a digital clock.
Direct call	Adds a dialer to initiate an audio or video call according to the configurations done under the Outgoing call mode option. Contact selection is available when you add it to the Home screen.
Direct call-video	Adds a dialer to initiate a video call. Contact selection is available when you add it to the Home screen.
Direct call-voice	Adds a dialer to initiate an audio call. Contact selection is available when you add it to the Home screen.
Notifications	Adds a panel for the current notifications.
Photo Gallery	Adds a panel to display images. Image selection is available when you add the widget to the Home screen.
Search	Adds a search panel.
Settings shortcut	Adds a shortcut for the configuration options present in the Settings application.

Top Bar

The Top Bar is a horizontal bar at the top of the screen that displays the time, date, and notifications. The presence information is displayed only in an Avaya Aura® environment.

Top Bar modes

The Top Bar has the following modes:

- Normal mode

- Expanded mode

Swiping down the normal mode of the Top Bar displays the expanded mode and swiping up the expanded mode displays the normal mode of the Top Bar.

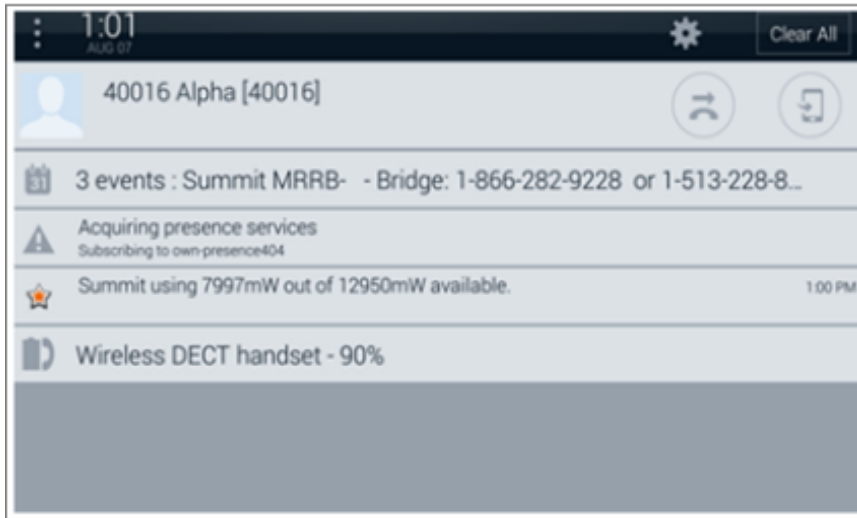

Normal mode

In the normal mode, the Top Bar displays maximum 13 notifications. If there are more than eight notifications, the Collaboration Station displays the **Hidden** icon « to view the remaining notifications. Dismissing one or more notifications displays the remaining notifications that are not displayed if the number of notifications exceeds 13.

Expanded mode

In the expanded mode, the Top Bar displays all notifications with their details.

Communication containers

Communication containers are rectangular regions in the Communication screen that represent conversation sessions or calls.

Containers provide the following information:

- List of participants.
- Call states, such as active call or call on hold.
- Controls for starting and managing calls.

Parts of a container

Number	Name	Description
1	Header	Displays an icon to indicate the call type. Header of an active call container displays the call state and media indicators, a label, call duration, call quality indicator, and optional icons for container management.
2	Body	Displays contact cards of participants. A contact card includes the image, name, and phone number of a participant. An end-to-end encrypted call icon (🔒) is displayed for audio and video calls if configured.
3	Controls	Displays options for starting audio or video calls. Precall and mid-call features are only active in an Avaya Aura® environment.

States of a container

A container can be in one of the following states:

- Open: Displays the header and body.
- Closed: Displays only the header.

Related links

[User Interface](#) on page 22

[Call management](#) on page 64

Types of communication containers

Communication containers are of the following types:

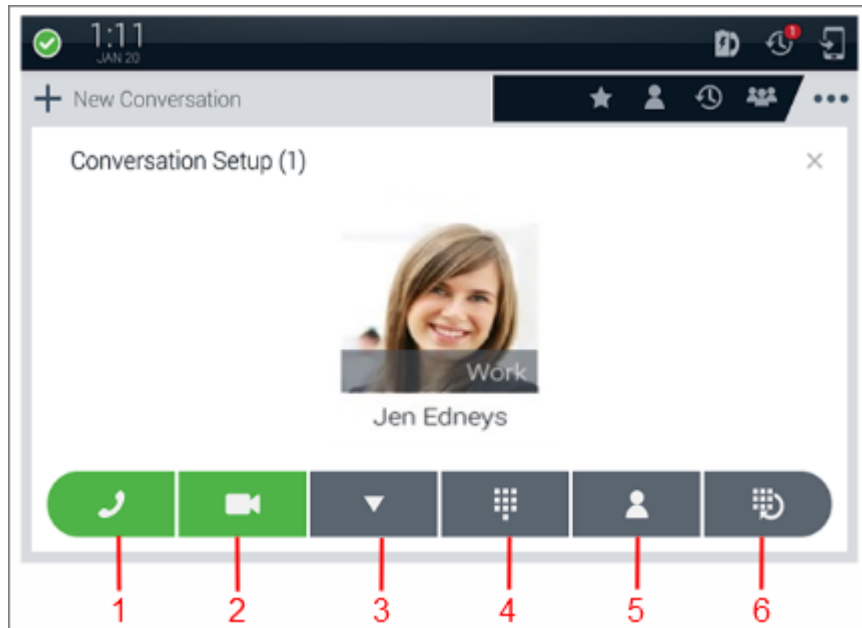

- New call container

- Active call container
- Call on hold container

New call container

A new call container provides:

- A location to add call participants.
- Controls for starting audio or video calls.
- Precall settings. This feature is only active in an Avaya Aura® environment.

Number	Name	Description
1	Audio Call	Starts an audio call.
2	Video Call	Starts a video call.
3	Precall Features	Displays the precall menu. This feature is only active in an Avaya Aura® environment.
4	Dial Pad	Displays the soft dial pad.
5	Contacts	Displays the Contacts list.
6	Redial	Displays the Input Panel with the last dialed number or the Recents list.

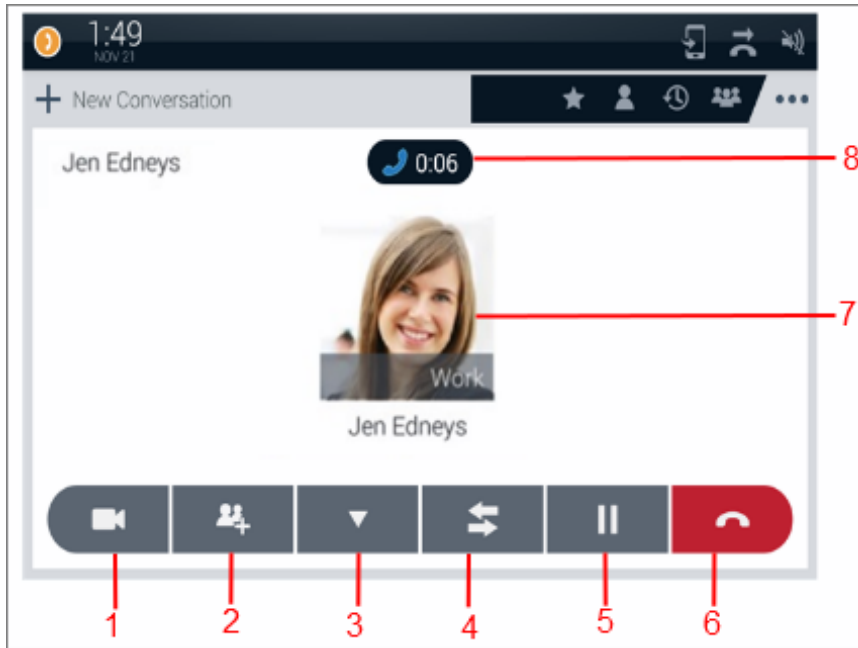

Active call container

An active call container displays:

- Contact cards of participants in the container body.
- An active call icon, a call duration indicator, icons for call state information, and a call quality indicator in the container header.

+ Tip:

The Collaboration Station displays the call quality indicator only when the call quality deteriorates. Ensure that the feature is enabled by the administrator.

Number	Name	Description
1	Video Call	Starts a video call.
2	Add Participant	Adds another contact to an active call.
3	Mid Call Features	Displays the mid-call menu. This feature is only active in an Avaya Aura® environment.
4	Transfer	Transfers the active call.
5	Hold	Puts the active call on hold.
6	End Call	Ends the call.
7	Contact Card	The contact card of the called person.
8	Call Details Area	Displays the call type icon, call duration, and call quality indicator.

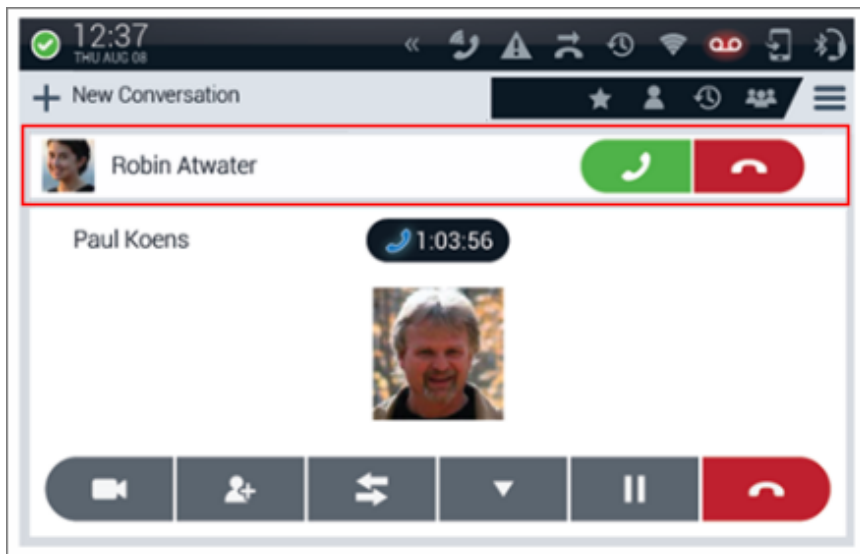

Call on hold container

A call on hold container contains an on-hold call. A call on hold container displays the call on hold icon and the call hold timer in the header. The Collaboration Station displays a call on hold container in a closed state.

Ringing call container

A ringing call container contains an ignored call and displays controls to answer or reject the call. The Collaboration Station displays a ringing call container in a closed state.

Packaged components

Ensure that the package contains the following parts:

- The Collaboration Station base
- Wireless handset
- Two AAA rechargeable batteries
- Ethernet cable
- Camera
- 2-meter USB cable

The camera and USB cable are packaged in a separate box.

The package might also contain the following optional components:

- Wired handset with a handset cord
- Charging pins cover

You might also get a package of an AC power adapter and cord if you ordered one for the device.

Checking the port information and status

About this task

Use the following procedure to check the following port information:

- Port name and its physical location on the device
- Name of the device plugged into a port and the power required for the device
- Indication if a device is not authorized for a particular port
- Available power

Procedure

1. Go to the Settings screen.
2. Tap **DEVICE > USB**.

The Collaboration Station displays the port information under **USB DEVICES**.

[Connectors and controls](#) on page 47

Connecting the Collaboration Station to the network

About this task

You can connect your Collaboration Station to an Ethernet or a Wi-Fi network. The Wi-Fi option is enabled by default in the settings file.

If you connect to a Wi-Fi network that has a Captive portal enabled, the Collaboration Station displays a notification in the Top Bar to sign into to the Wi-Fi network. Tapping the notification in the Top Bar opens the Captive portal page where you need to provide the login details to login to the network.

Procedure

1. If you are connecting the deskphone to a wireless network or a wired network that does not have a 802.3at PoE or 802.3af PoE injector specification, connect the power adapter to the 48–V DC power connector at the back of the Collaboration Station and plug the power adapter into an electrical outlet.
2. Perform one of the following actions:
 - To connect to a wired network, plug one end of an Ethernet cable into the LAN connector at the back of the Collaboration Station. Plug the other end into an available LAN port.
 - To connect to a wireless network:
 - a. Wait for the deskphone to initialize and display the LOGIN screen.
 - b. Tap the Settings icon.
 - c. Tap **WIRELESS & NETWORKS > Network > Network mode > Wi-Fi**.
 - d. Tap **Wi-Fi** and select a network from the list of networks.
 - e. Enter the login credentials that the Collaboration Station displays if the Wi-Fi network is a secured network.

Connecting a wired handset

About this task

If you bought the Collaboration Station with a wireless handset and now want to replace the wireless handset with a wired handset, then you must cover the pins as described in this task. If you ordered the Collaboration Station with a wired handset, the charging pins are covered and you only need to connect the handset.

You cannot use the wireless handset if you connect a wired handset.

Procedure

1. Perform the following steps only if you are replacing the wireless handset with the wired handset, else skip the steps.
 - a. From the back of the device, remove the screw that is below the charging pins bushing.
 - b. Remove the charging bushing plastic.
 - c. Attach the blind bushing plastic cover from the top and secure it with a screw.
2. Plug non-spiral end of the handset cord into the handset connector on the Collaboration Station.
3. Plug the other end into the connector in the handset.
4. Disable the wireless handset.

Mounting and connecting the camera

Procedure

- For integrated mount:
 1. Position the camera on the Collaboration Station.
 2. Fold the camera leg and insert the camera latch in the twist lock at the back of the Collaboration Station.
 3. Plug one end of the camera cable into the camera connector of the Collaboration Station. Plug the other end into the connector in the camera.
- For external mount:
 1. Position the camera on the external monitor and open the camera leg to balance the camera properly.
 2. Plug one end of the camera cable into the camera connector of the Collaboration Station. Plug the other end into the connector in the camera.
 3. Plug one end of the video cable into the video display out connector of the Collaboration Station. Plug the other end into the video display in connector of the external monitor.

Installing the wireless handset

Before you begin

Ensure that the administrator configured the country settings and enabled the DECT menu option for the wireless handset. Once you have installed the wireless handset, the batteries will take around 16 hours to get fully charged for the first time.

Procedure

1. Install the batteries in the battery slot by matching the poles as shown in the slot label.

 **Danger:**

There is a risk of explosion if you use an incorrect type of battery.

2. Put the wireless handset in the cradle.

The Collaboration Station displays the battery level and the pairing information in the Top Bar.

External monitor

The Avaya H175 Video Collaboration Station has a capability to display video calls on an external monitor. You can also you connect the Collaboration Station to your personal computer and external monitor in such a way that your computer desktop and video calls are projected on the external monitor. To support this capability, the Collaboration Station has:

- A digital display video output connector that is capable of supporting monitors with an HDMI, DVI, or Displayport++ interface
- A digital display video input connector that is capable of supporting computers with an HDMI, DVI-D/I, or Displayport++ interface

Collaboration Station supports HDMI 1.2 specification with:

- Maximum resolution of 1920x1200 @ 60Hz
- 60Hz and 59.94 progressive-scan refresh rates
- Pass-through latency of less than 50ms
- 2 channels 16-bit LPCM with 32kHz, 44.1kHz or 48kHz sampling rates
- sRGB or custom RGB color space

*** Note:**

To ensure the EMC Class B compliance when using a Collaboration Station with an external HDMI monitor, the monitor must be of a type with an external AC or DC power supply.

Supported resolutions

Resolution	Aspect ratio	Name
1920 x 1080	16:9	FHD, 1080p

Connecting the Collaboration Station to an external monitor and a computer

About this task

You can connect the Collaboration Station with an external monitor and your computer. When connected this way, the Collaboration Station can project the computer desktop and video calls on the external display. The video is overlaid on the computer desktop so that you can continue working while attending the call.

If you are viewing video on the external monitor, place the camera on top of the monitor for better a better eye contact perception.

Before you begin

Ensure that you have two video cables depending on the video capabilities of your computer and the external monitor.

Procedure

1. To connect the computer and the Collaboration Station, plug one end of the appropriate video cable into the connector of the computer and the other end into the digital display video input connector of the Collaboration Station .

2. To connect the external monitor and the Collaboration Station, plug one end of the appropriate video cable into the digital display video output connector of the Collaboration Station and the other end into the connector of the external monitor.

Changing the size and location of a video window

About this task

You can change:

- The location of the **Self-view Pane** on an external monitor
- The video window layout on an external monitor
- The video window layout of a conference call

You can select a layout by tapping the **Video Layout Option** control. Alternatively, you can tap and hold any of the video windows and select **Layout options** from the menu that the Collaboration Station displays.

Procedure

1. In the video call container, tap the **Video Layout Option** control.
2. Perform one of the following actions:
 - To change the location of the **Self-view Pane** on an external monitor, tap **Self view**.
 - To change the location of video windows on an external monitor, tap **External display**.
 - To change the location of video windows in a conference call, tap **Conference**.
3. Tap the appropriate layout.

Communication containers

Communication containers are rectangular regions in the Communication screen that represent conversation sessions or calls.

Containers provide the following information:

- List of participants.
- Call states, such as active call or call on hold.
- Controls for starting and managing calls.

Parts of a container

Number	Name	Description
1	Header	Displays an icon to indicate the call type. Header of an active call container displays the call state and media indicators, a label, call duration, call quality indicator, and optional icons for container management.
2	Body	Displays contact cards of participants. A contact card includes the image, name, and phone number of a participant. An end-to-end encrypted call icon (🔒) is displayed for audio and video calls if configured.
3	Controls	Displays options for starting audio or video calls. Precall and mid-call features are only active in an Avaya Aura® environment.

States of a container

A container can be in one of the following states:

- Open: Displays the header and body.
- Closed: Displays only the header.

Types of communication containers

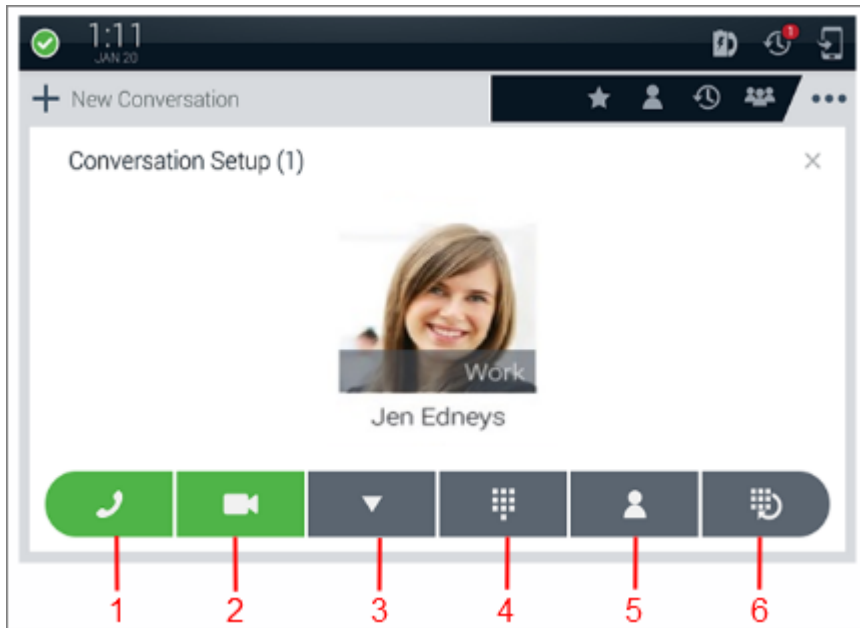

Communication containers are of the following types:

- New call container
- Active call container
- Call on hold container

New call container

A new call container provides:

- A location to add call participants.
- Controls for starting audio or video calls.
- Precall settings. This feature is only active in an Avaya Aura® environment.

Number	Name	Description
1	Audio Call	Starts an audio call.
2	Video Call	Starts a video call.
3	Precall Features	Displays the precall menu. This feature is only active in an Avaya Aura® environment.
4	Dial Pad	Displays the soft dial pad.
5	Contacts	Displays the Contacts list.
6	Redial	Displays the Input Panel with the last dialed number or the Recents list.

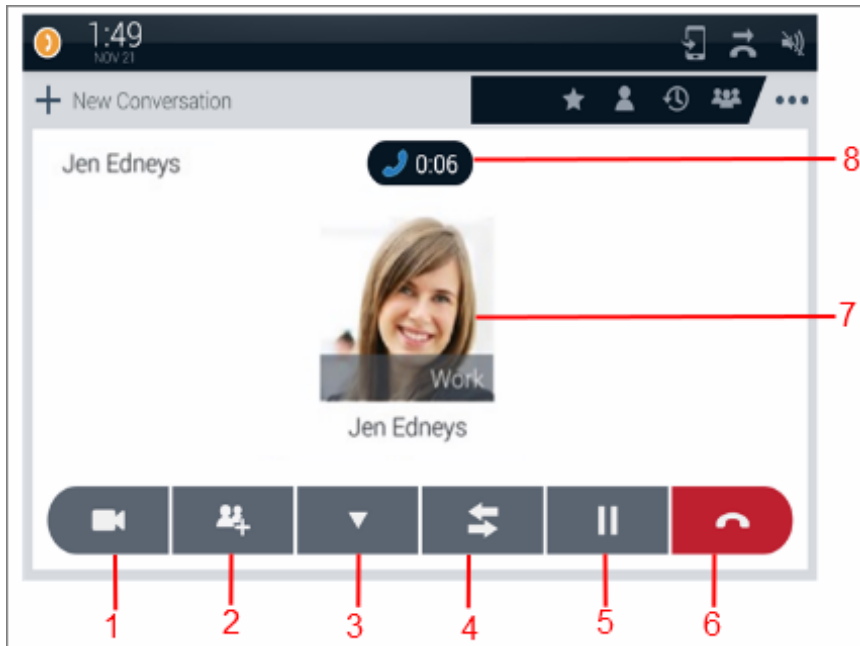

Active call container

An active call container displays:

- Contact cards of participants in the container body.
- An active call icon, a call duration indicator, icons for call state information, and a call quality indicator in the container header.

+ Tip:

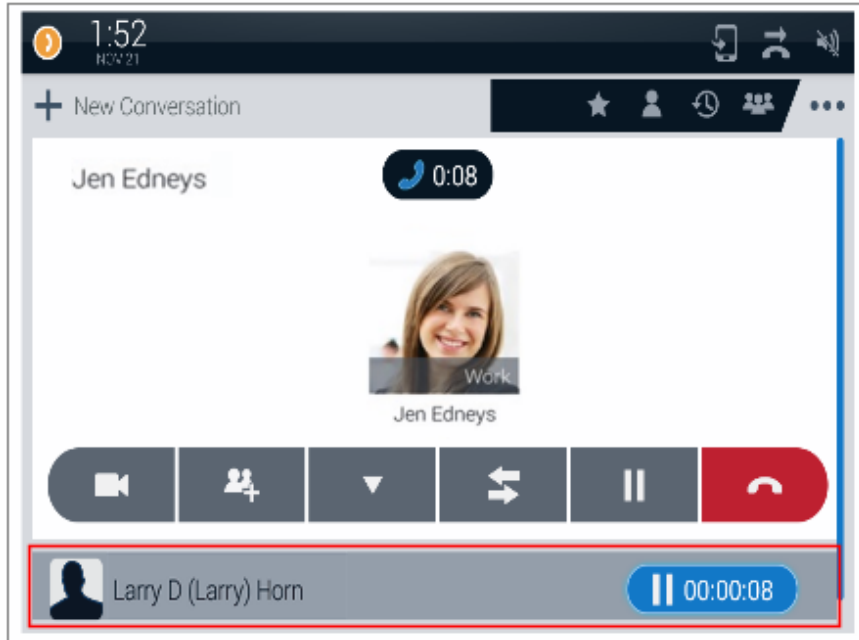

The Collaboration Station displays the call quality indicator only when the call quality deteriorates. Ensure that the feature is enabled by the administrator.

Number	Name	Description
1	Video Call	Starts a video call.
2	Add Participant	Adds another contact to an active call.
3	Mid Call Features	Displays the mid-call menu. This feature is only active in an Avaya Aura® environment.
4	Transfer	Transfers the active call.
5	Hold	Puts the active call on hold.
6	End Call	Ends the call.
7	Contact Card	The contact card of the called person.
8	Call Details Area	Displays the call type icon, call duration, and call quality indicator.

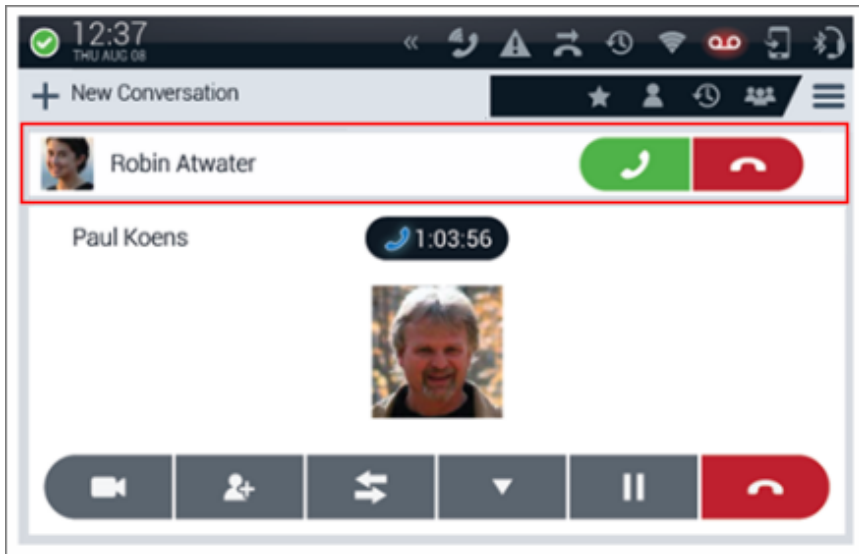

Call on hold container

A call on hold container contains an on-hold call. A call on hold container displays the call on hold icon and the call hold timer in the header. The Collaboration Station displays a call on hold container in a closed state.

Ringing call container

A ringing call container contains an ignored call and displays controls to answer or reject the call. The Collaboration Station displays a ringing call container in a closed state.

Making an emergency call

About this task

If your administrator configured emergency calling for your Collaboration Station, you can make a call to immediately connect to a preset emergency services number. You can make an emergency call when your Collaboration Station is in the logged out or locked state. The Collaboration Station provides the following types of emergency dialing:

- Auto dial: Automatically dials a preconfigured number.
- Manual dial: Provides the facility to manually dial the number.

Procedure

1. On the LOGIN or the UNLOCK screen, tap **Emergency call** in the lower-right corner.
In an IP Office environment, **Emergency call** is available only on the LOCK screen.
2. Perform one of the following actions:
 - Tap **Auto - Dial** to automatically dial a preconfigured emergency number.
 - Tap **Manual Dial** to manually dial the emergency number.

[Call management](#) on page 64

Precall operations

This feature is only active in an Avaya Aura® environment. The Collaboration Station provides a menu of precall features that you can apply to outgoing calls:

- Call Unpark
- Exclusion
- Priority Call
- Block Calling Party Info
- Unblock Calling Party Info
- Whisper Page
- Auto Intercom
- Dial Intercom

The precall menu is available in the new call container or in the Launch Panel of the idle Communication screen.

Your Collaboration Station displays only those precall menu options that your administrator configured for you.

Whisper Page

Use Whisper Page to interrupt a call for making an announcement to a contact. When you use Whisper Page:

- Only the paged contact can hear you. Other participants cannot hear you, and you also cannot hear them. However, other participants on the call hear the whisper page notification tone.
- If a paged contact is not in a call, the Collaboration Station converts the whisper page to a priority call that overrides any active call redirection feature.
- If a paged contact is in a call, the active call container of the contact becomes a whisper page container.
- If a paged contact call is on the speaker, the Collaboration Station plays the whisper message on the speaker.
- Participants on bridged appearances of the paged contact hear the whisper page notification, but only the paged contact hears the announcement.

Blocking and unblocking your caller information

About this task

By default, the Collaboration Station displays your name and number to the called person during outgoing calls. Use Block Calling Party Info to prevent the information display for a particular call.

The administrator can also configure the Collaboration Station to prevent the information display for all outgoing calls. In this case, use Unblock Calling Party Info to display the information for a particular call.

Procedure

1. Go to the Communication screen.
2. Tap **New Conversation**.
3. Tap **Precall Features**.
4. Perform one of the following actions:
 - To block the information display, tap **Block Calling Party Info..**
The Collaboration Station displays the message `Your Caller Id will be blocked.`
 - To unblock the information display, tap **Unblock Calling Party Info..**

Calling an intercom group member

About this task

If you are a part of an intercom group, you can use:

- Auto Intercom to call a specific person in the intercom group with a dedicated one-touch dial option.
- Dial Intercom to call any person in the intercom group with a dial code number that the administrator assigned to that person.

Procedure

- To make a call to a specific person in an intercom group:
 1. Go to the Communication screen.
 2. Tap **New Conversation**.
 3. Tap **Precall Features**.

4. Tap the appropriate **Auto Intercom** option.
- To make a call to any one person in an intercom group:
 1. Go to the Communication screen.
 2. Tap **New Conversation**.
 3. Tap **Pre-call Features**.
 4. Tap the appropriate **Dial Intercom** option.
 5. In the Dial Intercom panel, enter the dial code.
 6. Tap **OK**.

Making a priority call

About this task

Use the Priority Calling feature to provide a distinct ringing alert to the called person.

Procedure

1. Go to the Communication screen.
2. Tap **New Conversation**.
3. Tap **Pre-call Features**.
4. Tap **Priority Call**.

The Collaboration Station displays the `This will be a priority call message`.

5. Make a call to the required contact.

[Pre-call operations](#) on page 75

Unparking a call

About this task

Use the following procedure to unpark a call that you parked on another Collaboration Station.

Procedure

1. Go to the Communication screen.
2. Tap **New Conversation**.
3. Tap **Pre-call Features**.
4. Tap **Unpark Call**.

5. In the Unpark Call panel, enter the extension on which the call is parked.
6. Tap **OK**.

The Collaboration Station unparks the call and displays it as an active call.

Mid-call operations

This feature is only active in an Avaya Aura® environment. The Collaboration Station provides a menu of mid-call features that you can apply to active calls:

- Automatic Call Back
- Call Park
- Exclusion
- Extend Call
- Malicious Call Trace
- One Touch Recording
- Transfer To Voicemail

Your Collaboration Station displays only those options that your administrator configured for you.

Muting and unmuting a call

About this task

When you mute an active call, the contacted person cannot hear you. When the call is on mute, the Collaboration Station:

- Prevents audio transmission for all calls. For example, if you resume a call when mute is on, the resumed call remains on mute.
- Unmutes the call when you change to another audio device. For example, if mute is on while you are on a headset, lifting up the handset unmutes the call.

Procedure

To mute or unmute a call, press **Audio Mute**.

Putting and resuming a call on hold

Procedure

- To put a call on hold, tap **Hold**.

The Collaboration Station puts the active call on hold, changes the state of the active container to closed, and show a timer that indicates how long the call has been on hold.

- To resume an on-hold call, tap the container of the held call.

The Collaboration Station puts any active call on hold and resumes the selected call.

Parking a call

Before you begin

Use Call Park to put a call on hold on your Collaboration Station and retrieve the call on any other phone registered to the same or a different extension. When you park a call, the Collaboration Station displays a call park notification in the Top Bar followed by a Call Park icon.

If you end the call from the Collaboration Station, the Top Bar removes the call container, but the call remains parked and available for retrieval on any other Collaboration Station. You can park only one call at one time.

Procedure

1. During the call, tap **Mid Call Features**.
2. Tap **Unpark Call**.

Setting Auto Call Back

About this task

Set Auto Call Back if you call a person and hear a busy tone or the called contact is away. When you set Auto Call Back, the Collaboration Station alerts you with a call when the called contact is available. If you answer the call, the Collaboration Station plays a call back tone to you and then calls the other contact.

The Collaboration Station deactivates Auto Call Back if the call back does not occur within 30 minutes or you do not answer the Auto Call Back call.

Procedure

1. While the call is ringing or you hear the busy, tap **Mid Call Features**.
2. Tap **Auto Call Back**.

The Collaboration Station sets Auto Call Back and displays a confirmation message in the Top Bar.

Excluding others from bridging on to your call

About this task

You can use Exclusion to:

- Prevent a person from bridging on to a call.
- Drop a person who is bridged on to a call.

Procedure

- To prevent a person from bridging on to a call:
 1. Go to the Communication screen.
 2. Tap **Pre-call Features**.
 3. Tap **Exclusion**.
- To drop a person who is bridged on to a call:
 1. During the call, tap **Mid Call Features**.
 2. Tap **Exclusion**.

Related links

[Bridged Call Appearance](#) on page 94

Extending a call to your mobile phone

About this task

Use Extend Call to transfer an active call on your Collaboration Station to a preconfigured phone number.

Procedure

1. During the call, tap **Mid Call Features**.
2. Tap **Extend Call**.

The Collaboration Station transfers the call to a preconfigured phone number.

Turning Malicious Call Trace on or off

About this task

Use Malicious Call Trace to trace a malicious call. On activating Malicious Call Trace, the Collaboration Station starts call tracing to provide caller identification.

Procedure

- To turn on Malicious Call Trace:
 1. During the call, tap **Mid Call Features**.
 2. Tap **Malicious Call Trace**.
- To turn off Malicious Call Trace, tap **Malicious Call Trace** again.

Related links

[Mid-call operations](#) on page 79

Starting and stopping a call recording

About this task

Use One Touch Recording to record a call. The Collaboration Station saves the recorded call in your voicemail.

When recording is active, the active call container header displays a Record icon. One Touch Recording is unavailable for bridged calls.

Procedure

- To record a call:
 1. During the call, tap **Mid Call Features**.

2. Tap **Record**.
- To stop recording, end the call or tap **Record** again.

Transferring a call

About this task

You can transfer an active call to a:

- Contact
- Call on hold
- Number

Procedure

- To transfer a call to any contact:
 1. In the active call container, tap **Transfer**.

The Collaboration Station puts the active call on hold and displays a new call container.
 2. In the new call container, make a call to the required contact.
 3. Tap **Complete Transfer** to transfer without announcing the call, or announce the call when the contact answers, and then tap **Complete Transfer**.
- To transfer a call to a call on hold:
 1. Select the held call.
 2. Tap **Complete Transfer**.

Dialing modes

The Avaya H175 Video Collaboration Station supports two dialing modes:

- Manual: After you enter a number, you must manually start the call by tapping or pressing the appropriate button. You can:
 - Edit the number that you enter.
 - Call multiple contacts.
 - Select the call media – audio or video.
- Automatic: After you enter a number, the Collaboration Station automatically starts the call . You cannot select the call media because the Collaboration Station uses the default media to make the call. You can:
 - Delete, but not edit, the number that you enter.
 - Call only one contact.

Automatic dial mode is the default mode.

Redialing a number

About this task

You can configure your Collaboration to redial the last dialed number or display the Recents list from which you can select a number to dial.

Procedure

1. Redialing using the Launch Panel or a new call container:
 - a. Tap **Redial** in the Launch Panel or tap the **Redial** control in a new call container.
Depending on the redial mode, the Collaboration Station displays the Input Panel with the last dialed number or displays the Recents list.
 - b. Tap **Audio Call** or **Video Call** if the dial mode is set to manual, or wait for the Collaboration Station to initiate the call.
2. Redialing using the empty Input Panel:
 - a. Tap **Audio Call** or **Video Call**.
The Collaboration Station displays the last dialed number in the Input Panel.
 - b. Tap **Audio Call** or **Video Call** if the dial mode is set to manual or wait for the Collaboration Station to initiate the call.

Adding a participant to an active call

Procedure

1. In the active call container, tap **Add Participant**.
The Collaboration Station puts the active call on hold and displays a new call container.
2. In the new call container, make a call to the required contact.
3. When the contact answers the call, tap **Merge**.
The Collaboration Station merges the calls and starts a conference.

Calling the alternate number of a contact

Procedure

1. Go to the Contacts screen.

2. Tap the required contact.
The Collaboration Station displays the Contact Details screen.
3. Tap **One-touch Audio Dial** or **One-touch Video Dial** of the required alternate number.

Making a call while on another call

Procedure

1. Tap **New Conversation**.
2. In the new call container, tap the **Dial Pad** control.
3. Enter the number in the Input Panel.
4. Tap **Audio Call** if you are in the manual dial mode, or wait for the Collaboration Station to start the call.

When the contact answers the call, the Collaboration Station puts the previous call on hold and makes the current call the active call.

Incoming call management

The Collaboration Station provides various ways in which you can manage your incoming calls, such as reject a call or ignore a call. This section describes those methods.

Answering a call

About this task

If your answering mode is set to audio, your video transmission is blocked when you answer a call.

Procedure

Perform one of the following actions:

- In the Incoming Call Panel, tap **Accept Call**.
- Press **Speaker** for hands free.
- Press **Headset** to receive the call on the headset.
- Press the **Call control** button of the wireless headset or the wireless handset.
- Lift up the wired handset.

Ignoring a call

About this task

Ignoring a call stops audio alerts. The Collaboration Station displays the ringing call container with the ignored call. Message Waiting Indicator continues to flash until the call is answered, rejected, ends, or is diverted.

Procedure

In the Incoming Call Panel, tap **Ignore Call**.

Rejecting a call

About this task

Rejecting a call stops audio and video alerts and ends the call.

Procedure

In the Incoming Call Panel, tap **Decline Call**.

Answering a call while on another call

Procedure

In the Incoming Call Panel, tap **Accept Call**.

The Collaboration Station puts the current call on hold and displays an active call container for the new call.

Monitoring features

This feature is only available in an Avaya Aura[®] environment. Use the monitoring features to view the status of other Collaboration Stations and perform actions such as calling or answering calls for the monitored station. The Collaboration Station provides the following monitoring features:

- Team Button
- Busy Indicator
- Group Pickup
- Bridged Call Appearance

The Collaboration Station displays the monitoring features on the Monitored Extensions screen. Each monitoring feature displays the monitored stations and the following information:

- Image of the contact associated with the monitored station

Call management

- Status of the monitored station
- Redirection status in case of Team Button
- Action buttons based on the feature and the call state of the monitored station

The **Monitor** button on the Navigation Panel lights up if an administrator configures one or more monitoring features for your Collaboration Station. The **Monitor** button flashes when there is any activity on the monitored extension.

Bridged Call Appearance

Your administrator can configure one or more call appearances on your Collaboration Station to show a call appearance of another station. The call appearance of the other Collaboration Station that is configured on your Collaboration Station is called Bridged Call Appearance.

If an administrator configured a bridged call appearance on your Collaboration Station, you can:

- View the status of any non-idle bridge appearance of the primary extension.
- Answer calls for a bridged call appearance.
- Join an in-progress call on a bridged call appearance.

For example, if the Collaboration Station of a secretary is configured to bridge on to the extension of a boss, the secretary can:

- View calls coming on the extension of the boss.
- Answer or make calls for the boss. The calling person sees that the call is answered or made from the extension of the boss.
- Join a call that the boss is already active on.

The Collaboration Station displays the Bridged Call Appearance information on the Monitored Extensions screen in the Bridged Extensions group. Each Bridged Call Appearance has a separate row and includes the following information:

- Image of the contact associated with the monitored station
- Status of the monitored station
- Action button

Chapter 5: Call forwarding

Use this feature for forwarding incoming calls in an Avaya Aura® environment. In an IP Office environment, your administrator can configure call route using short codes. For more information, see *Administering Avaya IP Office™ Platform Voicemail Pro*.

You can forward incoming calls to another phone number or to your voicemail. Avaya H175 Video Collaboration Station supports the following call forward features:

- **Send All Calls:** Forwards all incoming calls to a preconfigured number that your administrator configured.
- **Forward All Calls:** Forwards all incoming calls to a number that you configure.
- **Forward All Calls When Busy/No answer:** Forwards incoming calls that you do not answer when you are away or busy to a number that you configure.
- **Enhanced Call Forward:** Forwards all incoming calls to a number depending on certain rules that you configure.

The Collaboration Station displays these features only if your administrator configured them for you.

Activating and deactivating Send All Calls

Before you begin

Enable call forwarding.

About this task

When you activate Send All Calls, the Collaboration Station redirects all incoming calls to a number that your administrator configured. Incoming calls ring only once at your Collaboration Station and then the Collaboration Station redirects the call. The redirected number is usually your voicemail.

Procedure

1. Go to the Settings screen.
2. Tap **FEATURES > Call Forwarding**.
3. Perform one of the following actions:
 - To activate Send All Calls, tap **Send All Calls > ON**.
 - To deactivate Send All Calls, tap **Send All Calls > OFF**.

Chapter 6: Video call management

The Collaboration Station supports video calls between two contacts and conference calls are made through Avaya Scopia®.

In an IP Office environment, video conference is supported through Avaya Scopia®.

In a video call, you can view one of the following video windows:

- **Self-view Pane:** Shows your video. The pane automatically activates when there is a change in the call state.
 - New video call/conference.
 - Incoming video call/conference.
 - Call unhold.
 - Escalating audio call to a video call.
- **Incoming Video Pane:** Shows the video of the person you called.

You can also connect an external monitor to the Collaboration Station and view video calls on the connected monitor.

A long tap on the **Self-view Pane** or the **Incoming Video Pane** displays the video context menu that provides options to:

- Change between the **Self-view Pane** and **Incoming Video Pane**.
- Show or hide the **Self-view Pane**.
- Adjust camera settings by opening the Camera app.
- Select video window layout options when viewing video in the full screen mode on the Collaboration Station or when connected to an external monitor.
- Shift video to an external monitor.
- View call statistics page.

* Note:

The **Self-view Pane** shows your video for two minutes and then fades away. To view the pane again, tap the preview button located on top of the preview area. The **Self-view Pane** then appears for another two minutes.

Chapter 7: Conferencing

The Collaboration Station supports:

- Audio and video conference through Avaya Scopia®.
- Audio and video conference through Avaya Aura® Conferencing with up to 720p resolution (active-speaker).

In an IP Office environment, video conference is supported through Avaya Scopia®.

- Only audio conference through Avaya Aura® Communication Manager in an Avaya Aura® environment.
- Local audio conference using a third-party server for survivability mode.

You can start a conference by:

- Adding a participant to an active call
- Setting up a conference by adding contacts in a new call container.

[Mid-conference operations](#) on page 113

Conference setup overview

You can set up a conference by adding contacts in a new call container. You can add contacts by:

- Dragging and dropping contacts from the Contacts, Recents, or Favorites list.
- Entering numbers through the hard dial pad or the **Dial Pad** control.

The following image shows dragging and dropping a contact from the Contacts list.

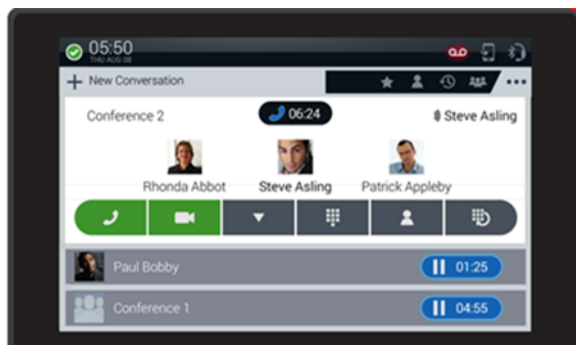

Before starting the conference call, you can:

- Remove a contact from the setup.
- Select an alternate number of a contact.

If a contact fails to answer or declines the call, the contact card displays a call failed icon for a few seconds. You can use the participant controls menu to open the details view of the contact and select an alternate number.

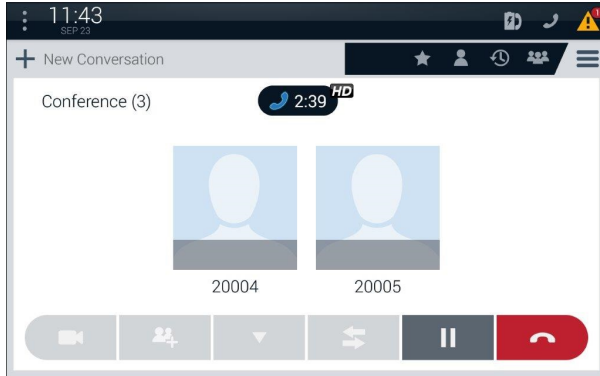

The following image shows an active audio call.

Local audio conference

For survivability mode, you can set up a local three-way audio conference by adding a participant to an active point to point call. You can revert to a point to point call by dropping the third participant.

The following image shows a local three-way audio conference in survivability mode.

* Note:

In survivability mode, only **Hold** and **End Call** controls are active. Tap and hold the contact card to see the audio statistics during an active conference.

Adding a participant to an active conference

About this task

You can add a participant from the:

- Dial pad
- Contacts list
- Held call

Procedure

1. Tap the **Add Participant** control.

The Collaboration Station puts the active conference on hold and displays a new call container.

2. Perform one of the following actions:

- Make a call to the contact by tapping the **Dial Pad** control.
- Make a call to the contact by dragging and dropping the contact from the Contacts list.
- Tap the header of the held call.

3. Tap **Merge** when the user answers the call or in the resumed call container.

Dropping a participant from an active conference

About this task

Avaya Aura[®] Communication Manager supports dropping only the last participant from the conference whereas Avaya Aura[®] Conferencing and Avaya Scopia[®] support dropping any participant. You can drop any participant from an active conference in an IP Office environment.

Procedure

- To drop the last participant from an Avaya Aura[®] Communication Manager conference:
 1. Tap and hold the conference window until the Collaboration Station displays the participant control menu.
 2. Tap **Drop Last Participant**.

Conferencing

- To drop a participant from an Avaya Aura® Conferencing or Avaya Scopia® conference:
 1. Tap **Conference**.
 2. Tap and hold the required contact card until the Collaboration Station displays the participant control menu.
 3. Tap **Drop**.

Chapter 8: Contacts

You can use the Contacts app to manage your contacts. You can add, delete, edit, sort, and filter contacts. If an image is available, you can see it in the contact card, the contact list, recents, call containers, conference call rosters, incoming call containers, compact call containers, monitoring panel records, lock screen, call forwarding, presence status panel, and the expanded top bar. Otherwise, the initial letter of the name or avatar (if the contact is stored without a name) is displayed. You can:

- Save an aggregate of 5000 contacts on Collaboration Station. The maximum number of contacts that you can save from each source is as follows:
 - 250 Avaya Aura® in an Avaya Aura® environment.
 - 250 Avaya one-X® Portal in an IP Office environment.
 - 5000 Microsoft Exchange Server contacts.

Chapter 11: Presence

This feature is only available in an Avaya Aura® environment.

If your administrator enabled the Presence feature for your Collaboration Station, you can view your presence information in the Top bar. With the Presence feature, you can:

- Track the presence status of a contact for whom you enabled presence tracking.
- Change your presence status.

You can view the presence information of a contact in the Contacts list. Information includes whether the contact is busy, available, away, or offline. Similarly, other users can also view information about you.

Chapter 12: Browser

The Collaboration Station supports an HTML 5 web browser. Use the browser to view and interact with the content and applications available on the Internet or your enterprise intranet. You can also dial a number without the Hash Key (#) or the numbers preceding it from within the browser using click-to-call.

The browser supports the following media types:

- JPEG
- GIF
- PNG
- BMP
- H.264 AVC
- VP8
- MPEG 4
- WAV

Shared control

The Collaboration Station supports shared control with Avaya one-X[®] Communicator. In the shared control mode, you can control the following features on the Collaboration Station:

- Start an audio call with Avaya one-X[®] Communicator.
- End an audio or a video call with Avaya one-X[®] Communicator.
- Put or remove a call on hold with Avaya one-X[®] Communicator.
- Put the Collaboration Station on mute with Avaya one-X[®] Communicator.
- Perform unattended transfer with Avaya one-X[®] Communicator.
- Start a conference by:
 - Merging two calls with Avaya one-X[®] Communicator.
 - Adding a contact to an active call with Avaya one-X[®] Communicator.
- Use Dual Tone Multi-Frequency (DTMF) to avail conference features with Avaya one-X[®] Communicator.

Group paging

Using the group paging feature, you can make a call to a group of users that your administrator sets up for you. A group page supports one-way audio, that is, when you send a group page, only you can speak. The called members cannot respond to your page. The page continues until you end it. However, the members can drop out from the page if required.

The Collaboration Station treats an answered group page call as a normal call. You cannot perform operations such as hold and transfer on the group page call. A group page member can receive a page only if:

- All call appearances on the Collaboration Station are idle.
- The Collaboration Station is not playing any audio.

Use the group pilot number to send a group page. Contact your administrator to know about the group pilot.

Chapter 14: Configuration

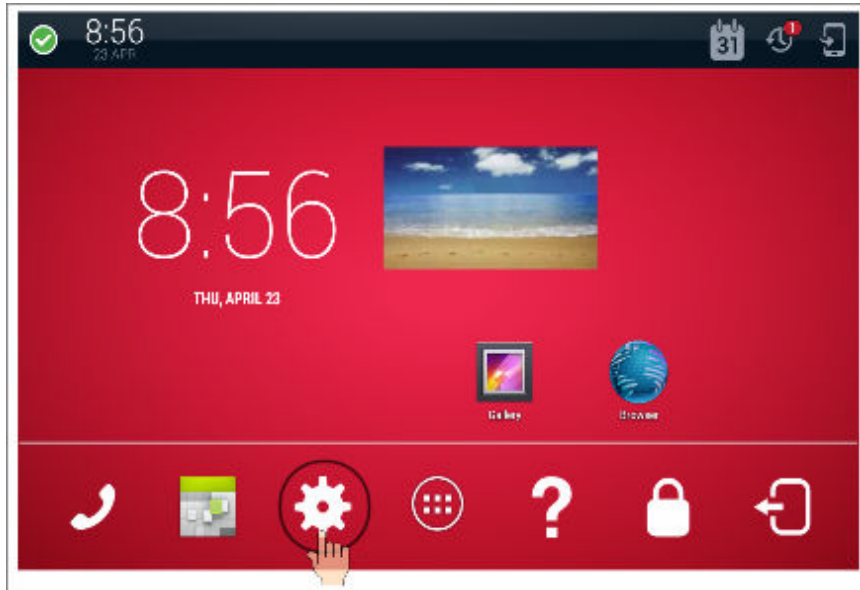

You can use the Settings app to configure your Collaboration Station and manage settings of various apps and features, such as Communication app and bluetooth.

Restarting the phone

About this task

Use this procedure when you make configuration-related changes to the phone.

Procedure

1. Go to the Settings screen.
2. Tap **Device and data reset > Reboot**.

Chapter 15: Personalization

You can change various settings of the Collaboration Station to suit your requirements. For example, add a widget on the Home screen or change the font size of the text.

Adjusting the volume settings

About this task

Use the following procedure to adjust the volume for music, media, ringtone, notifications, and alarms using the **Settings** app.

Procedure

1. Go to the Settings screen.
2. Tap **DEVICE > Sound > Volumes**.
3. Tap and drag the slider bars to assign a volume level to any of the following options:
 - **Music, video, games, & other media**
 - **Ringtone & notifications**
 - **Alarms**

Using the volume button

Configure the following settings of your Collaboration Station by using the **Volume** button:

- Ringer and Notification volume.
- Media volume.

*** Note:**

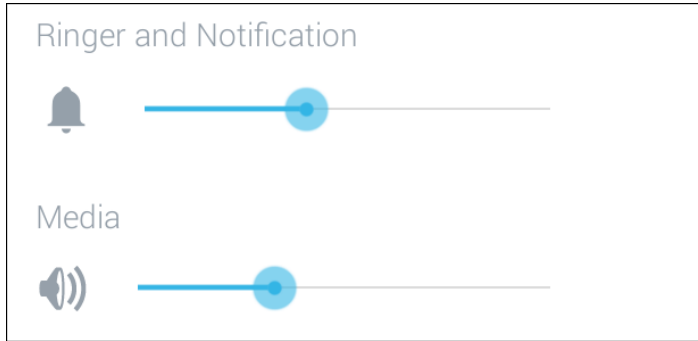

When you are on an active call, the Media volume controls the volume of the voice. However, the microphone volume remains at a non-zero level. Making a new call restores the volume to the lowest non-zero level for an active call.

Ringer, notification, and media volume panel

The following panel appears when you use the **Volume** button on your Collaboration Station.

- Tap the settings icon to expand the panel and control the media volume. The Collaboration Station displays the following panel.

Ringer and Notification panel at zero volume

Use the **Volume** button to control the ringer and notification volume. The Collaboration Station displays the following control bar when the volume of the Ringer and Notification is at zero level and plays a notification sound.

Voice volume at zero volume

Use the **Volume** button to control the voice volume. The Collaboration Station displays the following control bar when the volume of the voice is at zero level and plays a notification sound.

Personalizing ringtones

Use this procedure for personalizing ringtones in your device.

This feature is only available in an Avaya Aura® environment.

Procedure

1. Go to the Settings screen.
2. Tap **DEVICE** > **Sound** > **CALL RINGTONES** > **Personalized ringing**.
3. Select one of the following call types:
 - **Inside calls**
 - **Outside calls**
 - **Priority calls**

- **Intercom calls**
 - **Forwarded calls**
 - **Bridged calls**
 - **Team button calls**
 - **Call-Pickup Group**
4. Select the required ringtone.
 5. Tap **OK**.

Chapter 16: Troubleshooting

Camera not working

Camera not working

Camera is not capturing video images or the camera LED is not lighting up.

Camera cable not connected properly

Camera has a dedicated USB in the Collaboration Station and works only if the camera cable is connected to the dedicated USB.

Solution

Ensure that the camera cable is connected to the dedicated camera USB in the Collaboration Station and you have opened the privacy shutter of the camera.

Video not showing on the external monitor

Video not showing on the external monitor

The video is not getting transferred to the external monitor.

Video transfer not initiated by tapping **Extend To Monitor**

The video starts transferring to the external monitor only when you tap **Extend To Monitor**.

Solution

While in the call, tap **Extend To Monitor**.

The base of the device is hot

Condition

The base of the device is hot.

Cause

Avaya H175 Video Collaboration Stations generate more heat than other deskphones. This behavior is expected and within product safety standards (IEC 60950-1). The heat from the deskphone dissipates from the lower plastic cover and finally through the space between the rubber foot pads.

Solution

Ensure that:

- You have put the device on a flat surface, such as a table, for proper heat dissipation.
- You have not kept any object, such as paper or cloth, below the device.
- The operating temperature is between 0 °C to 40 °C as the surface temperature increases relative to the operating temperature. The operating temperature is the ambient temperature of the room.
